3. Patentees contemplate making a foam by extruding and foaming a polymer blend of a styrene/ethylene and polyethylene (note col. 2 and col. 18 line31 et.seq.). The foams of the reference would inherently possess the same properties called for in the instant claims.
4. It has been held that where applicant claims a composition in terms of function, property or characteristic where said function is not explicitly shown by the reference and where the examiner has explained why the function, property or characteristic is considered
